Note 1: Daily Average Revenue Trades (DARTs) – customer orders divided by the number of trading days in the period.

Note 2: FDIC insured client bank deposit sweep program balances with participating banks. These deposits are not reported in the Company's statement of financial condition.

Note 3: Commissionable Order – a customer order that generates commissions.

Note 4: Mark to market gains and losses on investments in U.S. government securities and associated hedges are included in Other Income. In the general course of business, we hold these investments to maturity. As a result, accumulated mark to market gains or losses should converge to zero at maturity. Accounting conventions require broker-dealers, unlike banks, to mark all investments to market.

Note 5: In connection with our currency diversification strategy, we have determined to base our net worth in GLOBALs, a basket of 10 major currencies in which we hold our equity. The total effect of the currency diversification strategy is reported in Comprehensive Income and the components are reported in (1) Other Income and (2) Other Comprehensive Income ("OCI") on the balance sheet. The effect of the GLOBAL on our comprehensive income can be estimated by multiplying the total equity for the period by the change in the U.S. dollar value of the GLOBAL during the same period.

Note 6: Trade money is the total amount of money clients spent or received, including all commissions and fees.

Note 7: Consistent with the clients' trading activity, the computed VWAP benchmark includes extended trading hours.
